

Практическая работа номер 9

1.Создаем новый проект

2.Оформляем заставку нашего приложения

3.Пишем код для перехода активностей

```
class MainActivity : AppCompatActivity() {  
    override fun onCreate(savedInstanceState: Bundle?) {  
        super.onCreate(savedInstanceState)  
        enableEdgeToEdge()  
        setContentView(R.layout.activity_main)  
  
        android.os.Handler(Looper.getMainLooper()).postDelayed({  
            val intent = Intent(packageContext, this, calculator::class.java)  
            startActivity(intent)  
        }, delayMillis: 1500)  
  
        ViewCompat.setOnApplyWindowInsetsListener(findViewById(R.id.main)) { v, insets ->  
            val systemBars = insets.getInsets(WindowInsetsCompat.Type.systemBars())  
            v.setPadding(systemBars.left, systemBars.top, systemBars.right, systemBars.bottom)  
            insets  
        }  
    }  
}
```

4.Добавляем цвета и стиль в colors.xml

```
<?xml version="1.0" encoding="utf-8"?>  
<resources>  
  
    <style name="Button_Style" parent="Widget.AppCompat.Button.Colored">  
        <item name="android:background">@color/purple_200</item>  
        <item name="android:textSize">24sp</item>  
        <item name="android:textColor">@color/black</item>  
        <item name="android:gravity">center</item>  
    </style>  
  
    <color name="black">#FF000000</color>  
    <color name="white">#FFFFFFFF</color>  
    <color name="purple_200">#710a69</color>  
    <color name="purple_500">#710a69</color>  
    <color name="purple_700">#FF3700B3</color>  
    <color name="teal_200">#FF03DAC5</color>  
    <color name="teal_700">#FF018786</color>  
    <color name="red">#10b9a7</color>  
    <color name="pink">#FFC0CB</color>  
    <color name="orange">#9bbacb</color>  
    <color name="neon_green">#6bc6ff</color>  
</resources>
```

5.Добавляем viewbinding и exp4j

```
buildFeatures {  
    viewBinding = true  
}
```

```
implementation ("net.objecthunter:exp4j:0.4.8")
```

6.Дизайн макета в activity_calculator.xml

```
